DHANUMITHRA T

Aspiring Data Analyst | M.Sc. Software Systems
Coimbatore, Tamil Nadu | +91 6369909885 | dhanumithra6002@gmail.com | linkedin.com/in/dhanumithra-t | github.com/Dhanumithra

PROFESSIONAL SUMMARY

M.Sc. Software Systems student (CGPA 8.64/10) with hands-on experience in database integration, data validation, and analytics-driven testing across two internships. Strong analytical foundation in SQL/NoSQL systems and edge-case analysis, with proven stakeholder communication and presentation skills honed through requirement-gathering and public-speaking engagements.

EDUCATION

Coimbatore Institute of Technology — M.Sc. Software Systems *2024 – 2029*
CGPA: 8.64 / 10 | Coimbatore

National Model Matric Higher Secondary School — HSC *2022 – 2024*
HSC: 89% | SSLC: 95.2% | Coimbatore

TECHNICAL SKILLS

Databases:	MySQL, MongoDB, SQL, PL/SQL, JDBC
Data & Analysis:	Data Validation & Edge-Case Analysis, Graph & Network Analysis, NLP Processing, Data Visualization
Languages & Web:	Python, Java, C, C++, JavaScript, React.js, Angular
Tools & Frameworks:	Git/GitHub, Figma, PyTorch, Hugging Face
Soft Skills:	Stakeholder Communication, Technical Presentations, Analytical Problem-Solving

WORK EXPERIENCE

Software Development Intern — Lakshmi Groups (LSS) *Jan 2026 – Jun 2026*

- Partnered directly with stakeholders to gather requirements and finalize business rules, prototyping workflows in Figma and translating needs into technical and data constraints.
- Integrated MongoDB into a daily work management application, structuring data storage for core operations and reporting.
- Designed and executed edge-case test scenarios to validate data integrity, documenting outcomes and communicating progress to ensure smooth delivery.

Manual Website Tester (Intern) — Groomsy Ltd *Apr 2026 – May 2026*

- Validated feature-level data and functional accuracy across live website modules through functional, UI, and cross-browser testing.
- Logged and tracked defects with reproduction steps; ran regression tests to confirm data stability post-fix.

KEY PROJECTS

GlobalPulse — News Data Intelligence Platform
Java, MySQL, NLP

- Automated a full news-data pipeline in Java, ingesting live articles via the NewsData.io API and applying custom NLP to extract entities and keyword-frequency trends.
- Designed a JDBC-based MySQL schema for scalable querying and built an interactive dashboard to visualize analytics and trend data.

Crimora — Automated Offender Profiling & Crime Linkage System
Python, PyTorch, Hugging Face

- Applied graph mining and link prediction to model cross-jurisdictional crime linkages, uncovering hidden behavioral connections across cold cases.
- Built a multi-modal Generative AI and NLP pipeline to extract forensic entities and Modus Operandi (MO) signatures from unstructured narratives, unifying them with structured crime records.
- Integrated OpenStreetMap geospatial analytics and clustering to model offender mobility, delivering an explainable AI (SHAP)-backed decision-support platform.

HONORS & CERTIFICATIONS

- 1st Place, CODE BUZZ (FOSS) — solved three competitive programming problems in under 35 minutes, outperforming the first-year M.Sc. cohort.
- 2nd Place, Astronova's Logic Coding & Puzzles; Shortlisted, KLA UnHack Women's Hackathon.
- NPTEL Certifications: Programming in Modern C++ (Topper); Data Structures and Algorithms Using Python.

LEADERSHIP & INITIATIVES

- Lead Organizer, “Hack the Crack” Technical Event (403 Strats) — directed an end-to-end technical event for 50+ participants.
- Outreach Coordinator & Workshop Speaker, FOSS CIT — delivered a hands-on Flask workshop as an invited speaker, mentoring 50+ students.
- Joint Secretary, VIYUGAM (Rotaract Club, Vaagai Gang 50) — managed technical support and contributed to board-level decisions.
