DHANUMITHRA T

Curious Problem Solver | M.Sc. Software Systems
Coimbatore, Tamil Nadu | +91 6369909885 | dhanumithra6002@gmail.com | linkedin.com/in/dhanumithra-t | github.com/Dhanumithra

PROFESSIONAL SUMMARY

M.Sc. Software Systems student (CGPA 8.64/10) and curious problem solver with hands-on experience across two software internships, specializing in React.js, MongoDB, Supabase, and Gemini Vision API integrations. Competitive programmer with a 1st-place finish at CODE BUZZ; proven track record delivering production-ready web applications and QA workflows in Agile/Scrum environments.

EDUCATION

Coimbatore Institute of Technology — M.Sc. Software Systems *2024 – 2029*
CGPA: 8.64 / 10 | Coimbatore

National Model Matric Higher Secondary School — HSC *2022 – 2024*
HSC: 89% | SSLC: 95.2% | Coimbatore

TECHNICAL SKILLS

Languages:	C, C++, Python, JavaScript, SQL, PL/SQL
Web & Frameworks:	React.js, Angular, HTML5, CSS3, Tailwind CSS
Backend & Cloud:	REST APIs, MongoDB, Supabase (PostgreSQL), Firebase, Gemini Vision API
Tools & Practices:	Git/GitHub, Figma, Data Structures & Algorithms, Agile/Scrum, Manual & Regression Testing
Soft Skills:	Stakeholder Communication, Cross-Functional Collaboration, Technical Presentations

WORK EXPERIENCE

Software Development Intern — Lakshmi Groups (LSS) *Jan 2026 – Jun 2026*

- Led requirement-gathering sessions with cross-functional stakeholders and built interactive Figma prototypes to finalize business rules, reducing downstream UI/UX rework by 25%.
- Collaborated within a 3-engineer team to architect MongoDB schemas and implement scalable CRUD operations across core business modules.
- Authored edge-case test suites that caught 15+ pre-release defects and contributed to sprint code reviews, applying DSA best practices to improve code reliability.

Manual Website Tester (Intern) — Groomsy Ltd *Apr 2026 – May 2026*

- Conducted functional, UI, and cross-browser testing across 8+ web modules to validate compliance with business and design requirements.
- Logged and tracked 25+ defects with detailed reproduction steps and severity classifications; ran regression cycles that helped maintain stable production releases.

KEY PROJECTS

Crimora — Automated Offender Profiling & Crime Linkage System
Python, PyTorch, Hugging Face

- Applied graph mining and link prediction to model cross-jurisdictional crime linkages, uncovering hidden behavioral connections across cold cases.
- Built a multi-modal Generative AI and NLP pipeline to extract forensic entities and Modus Operandi (MO) signatures from unstructured narratives, unifying them with structured crime records.
- Integrated OpenStreetMap geospatial analytics and clustering to model offender mobility, delivering an explainable AI (SHAP)-backed decision-support platform.

ThoughtType — Timed Articulation & Synthesis Platform
Full-Stack Developer

- Built a full-stack platform to measure thought-to-text synthesis speed, featuring a dual-timer execution engine, keystroke ghost replay, and a hesitation heatmap for behavioral analysis.
- Implemented secure cloud-based authentication and client-side analytics to support user tracking and data integrity.

HONORS & CERTIFICATIONS

- 1st Place, CODE BUZZ (FOSS) — solved three competitive programming problems in under 35 minutes, outperforming the first-year M.Sc. cohort.
- 2nd Place, Astronova's Logic Coding & Puzzles; Shortlisted, KLA UnHack Women's Hackathon.
- NPTEL Certifications: Programming in Modern C++ (Topper); Data Structures and Algorithms Using Python.

LEADERSHIP & INITIATIVES

- Lead Organizer, “Hack the Crack” Technical Event (403 Strats) — directed an end-to-end technical event for 50+ participants.
- Outreach Coordinator & Workshop Speaker, FOSS CIT — delivered a hands-on Flask workshop as an invited speaker, mentoring 50+ students.
- Joint Secretary, VIYUGAM (Rotaract Club, Vaagai Gang 50) — managed technical support and contributed to board-level decisions.
